Totara is a game-changing LMS for the corporate sector, comprising a rich feature set and commercial grade support but with all of the benefits and freedom open source brings to play. Developed as a distribution of Moodle, the leading open source platform in the education sector, at Totara we have focused on the requirements of the corporate sector and extended the functionality to meet the specific requirements of corporate and work based learning.

Read more about the benefits of open source .

Take a tour of Totara and explore the videos and product sheets below to find out in more detail how Totara can benefit your organisation.

Totara Overview

Hierarchies and Frameworks

Learning Plans

Team Management

Content Management

Instructor Led, Face to Face Training

Social Learning

Assessment and Compliance

Reporting

HR/ERP/CRM Integration

In most circumstances you will require at least some interaction with other business systems. The most common scenarios are authenticated enrolment and transferring data from your company ERP, and receiving data from the LMS to an HR system.

With our Organization Manager module, Totara has been built to make this process easier and we have proven large-scale experience with enterprise integrations, including PeopleSoft, SAP and Oracle.

Languages

Totara LMS offers language support for selected languages based on subscriber demand. Other languages are translated by Totara Partners and offered in our distributions but are not officially supported in your subscription.

Supported languages **Translations distributed without official support**

Chinese (Mandarin), English (UK), French, German, Italian, Japanese, Spanish (International), Portugue

Arabic, Dutch, Finnish, Hebrew, Hungarian, Spanish (European), Swedish, Thai
